Dyes and Pigments Listing Determination Rulemaking
EPA and ETAD Discussion**

OSW met with the Ecological and Toxicological Association of Dyes and Organic Pigments Manufacturers (ETAD) to discuss rulemaking issues associated with the restart of the dyes and pigments listing determination. The list of meeting attendees and agenda are provided below.

Meeting Summary: Ecological and Toxicological Association of Dyes and Organic Pigments
Manufacturers

December 5, 2002
2:00 p.m. - 4:00 p.m.

On December 5, 2002, representatives from the Environmental Protection Agency's Office of Solid Waste met with representatives of the Ecological and Toxicological Association of Dyes and Organic Pigments Manufacturers (ETAD) to discuss the dye and pigment manufacturing industries listing determination. The purpose of the meeting was to describe the status of EPA's efforts to develop a new proposal for listing determinations and land disposal restrictions for wastes from the dye and pigment manufacturing industries subject to the consent decree in ED v. Whitman, Civ. No. 89-0598 (D.D.C.) (the RCRA "megadeadline" decree). EPA also described the Agency's current loadings-based approach to the rule. ETAD representatives provided preliminary input on two draft tables the Agency previously had shared with the Association. One table listed all potential manufacturers of dyes and pigments known to EPA after a review of publicly available data sources. The other described OSW's understanding of current on-site waste management practices at dye manufacturing facilities. ETAD offered to collect by the end of January additional information on certain facilities whose status as dye manufacturers remains unclear.
